Ikhlas Attarwala
04-10-19 / Week #2
Class Participation

For class today, I asked a variety of questions.

- Off to the side, I asked you what factors are clear determinants for when you should "throw a model out", and then we had a discussion about ethics & integrity
- I asked you about the size of a context window and its degree of importance
- Lastly I asked the presenter *why* vector-space word representations capture syntactic and semantic regularities in language so well
