Ikhlas Attarwala & Kelly Wachtel
(We worked together so our submission is the same)
01-17-19 / EECS 371 – KR&R
In-class assignment

~~Building a family tree~~ (could not find enough information)
Discography for a musician

- Ontology used:
    - [Music Ontology](): artists, albums, performances, arrangements
- What's my application/domain?
    - Music Artist
- What concepts and facts do I need in order to explore this domain?
    - Information about Artist
    - Title/cover art/basic information about the track/song
    - Year
- What concepts and facts are available in my chosen ontology?
    - MusicArtist or MusicGroup
    - Genre
    - Lyrics
    - Release
    - AudioFile
    - Track
    - CD
- How are they organized?
    - Not sure what the question is asking, a `label` titling a definition, a status of whether it is stable or unstable, a range and a domain.
- What's missing?
    - Although a URL is provided, we can't seem to access most information and many don't seem to be working
